

# Dream- exit:

May 28th, 2009

How with you I long to be  
-fade not into other shadows?  
Make a dream of life as dream at night  
for when I awaken you are not there

Make life a dream so when I wake  
I need not dream to have you  
dream to lose, to steal, to find  
When only I awaken having lost something  
some impression which hardly compels me to  
Jump up  
Wake up  
out of bed into cold morning climb  
sometimes I race to sleep so that I can deceive myself

Can't thou see my heart ache  
-feel my darkest fear?  
what is empathy towards other people cannot touch the  
waves across this water that need one single frequency  
one amplitude to harmonize them.

Can't thou see- even if I draw your eyes  
you need not eyes to understand  
For I don't see you and you don't see me  
Can't thou hear- I will convey to you  
Interoperate and orate for you  
All I need is for you to be not but a figure of speech

Speak to me!

Move with me like autumn day light plays and dances with  
the colors

the enriching of the leaves

So, show me colors

So, pass like seasons and only fortify them

collaborate to signify their happening

so one season follows from another-

when there is no need to look back

no need for sorrow until the last day

For when aligned right, each day happens

only so to be a platform of and for the next step

on a great move forward
